GMS ACCESS STANDARDS

A new set of standards were announced by the Minister of Health and Social Services in March 2019 that are aimed to raise and improve the level of service for patients in Wales from their GP practices.

These standards are:

- **People** receive a prompt response to their contact with a GP practice via telephone.
- **Practices** have the appropriate telephony systems in place to support the needs of people avoiding the need to call back multiple times and will check that they are handling calls in this way.
-
- **People** receive bilingual information on local and emergency services when contacting a practice.
- **People** are able to access information on how to get help and advice.
- **People** receive the right care at the right time in a joined-up way which is based on their needs.
- **People** can use a range of options to contact their GP practice.
- **People** are able to email a practice to request a non-urgent consultation or a call back.
- **Practices** understand the needs of people within their practice and use this information to anticipate the demand on its services.
